- ✓ MN based – National Coverage
- ✓ 8x MSPBJ Best Places to Work!

MINNEAPOLIS / ST. PAUL BUSINESS JOURNAL
BEST PLACES TO WORK 2022
★★★★8th Consecutive Year!★★★★

Enough about me...Let's get to the good stuff

Essential Chrome Extensions

to help you...

- Organize your different orgs/instances
- Debug User Issues
- Navigate Salesforce Metadata
- Access Hidden Record Data
- Work with Formulas like a Ninja
- Assist in creating useful end-user documentation
- Be an #AwesomeAdmin

Considerations

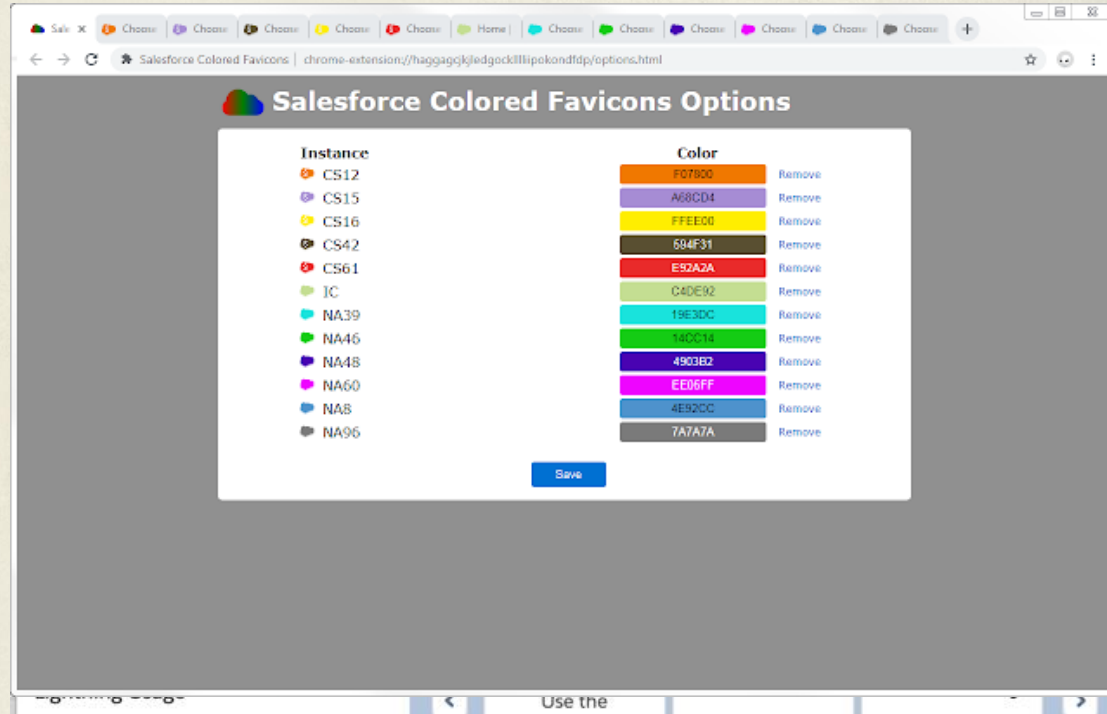

- Not officially supported by SFDC
- 3rd Party Developers
- Can randomly break
- Could interfere with browser
- Use at your Own Risk
- These are all for Chrome (might be available for Firefox)
- I'm assuming you know how to install and manage browser extensions

1. Salesforce Colored Favicon

- Allows you to assign different Favicon color for each SF instance
- Adds "S" for Sandbox instances and "DX" for dev instances
- Easily access right tab
- Extension:

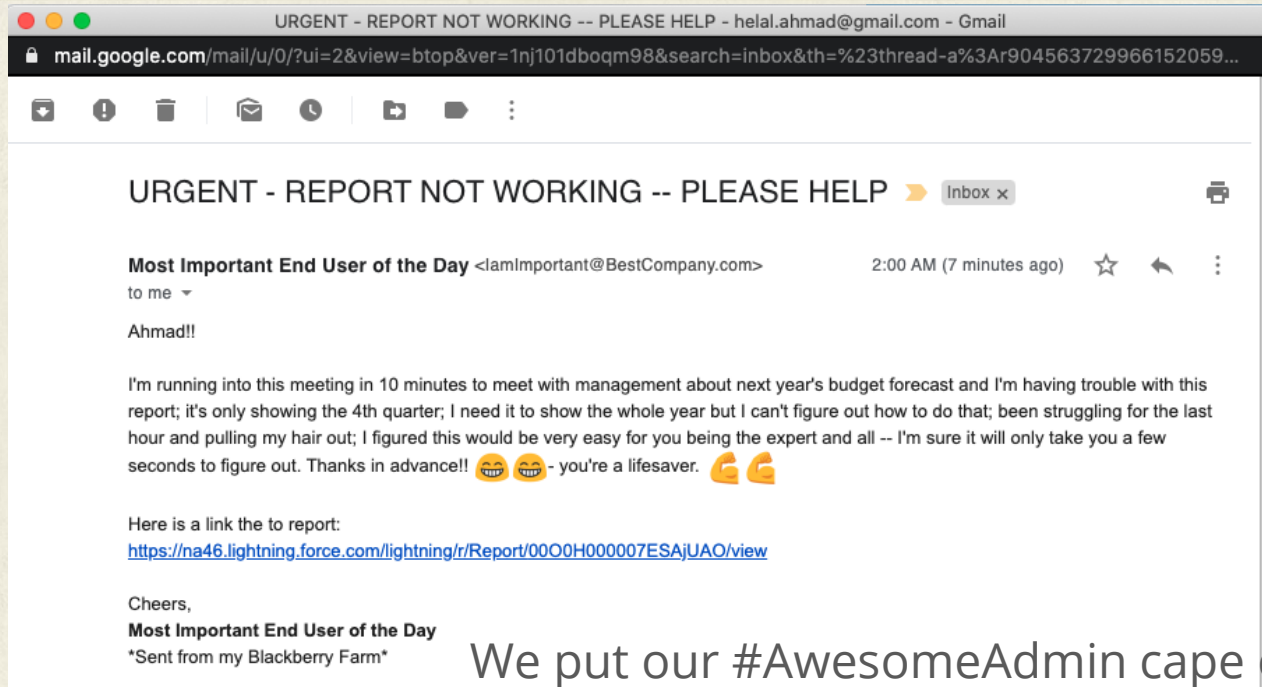

<https://bit.ly/3jNNOAD>

Story Time

We've all had this happen...

We put our #AwesomeAdmin cape on and
Click on the report link to investigate...

...only to find out...

Looks like something went wrong

We couldn't complete your request. Ask your Salesforce admin for help.

Error Details

The data you're trying to access is unavailable.

Continue

...the report is saved in their personal (private) report folder

...and even as the admin; you can't see the report...

At this point you have 2 options

1. Ask the user to move the report to a different folder (not ideal)
2. Login as the user to debug the issue

Option 2 is the best choice; but logging in as a user is quite cumbersome. You have to; 1) go to setup 2)navigate to the user record 3)Login as them 4) Navigate to the report.

What if there was a better way? 🤔 A quicker way...

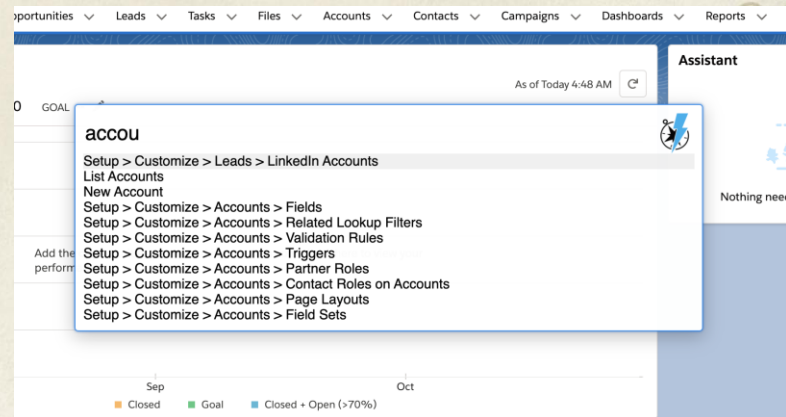

2. Quick Login As

- Allows you to quickly login as an end-user from your browser without navigating to setup or the user's record
- Immediately see the page you're looking at as another user
- When logging back out; takes you back to the page you were originally viewing.
- Uses the *User List Views* you've already setup
- Great for replicating and troubleshooting user permission or visibility issues on the fly.
- Extension: <https://bit.ly/2EzN9CL>

3. Salesforce Navigator

- Creates a Command Line Interface (CLI) for your org
- Quickly navigate to Setup Pages
- Quickly Access Objects & Field Setup
- Create New Records with a few keystrokes
- Let's take it for a spin!
- Original: <https://bit.ly/3i7XiFb>
- Lightning: <https://bit.ly/3gcLCR5>

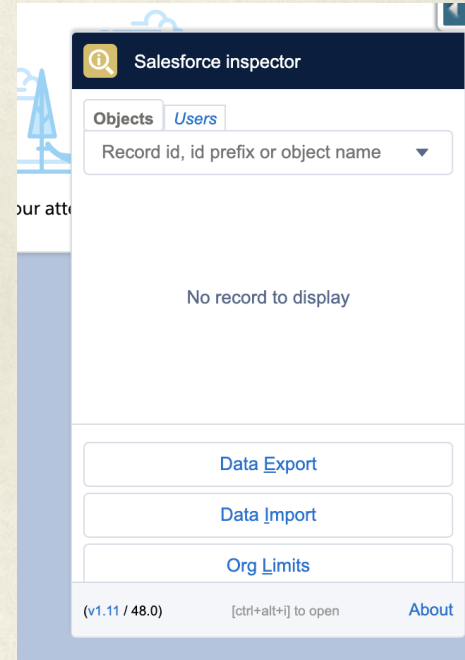

4. Enhanced Formula Editor

- \$20/annually
- Automatically Formats Formula
- Use Everywhere*
- Highlights Parenthesis
- Provides Autocomplete
- Find and Replace
- Makes. You. A. Formula Ninja.
- Extension: <https://bit.ly/3ggm5WU>

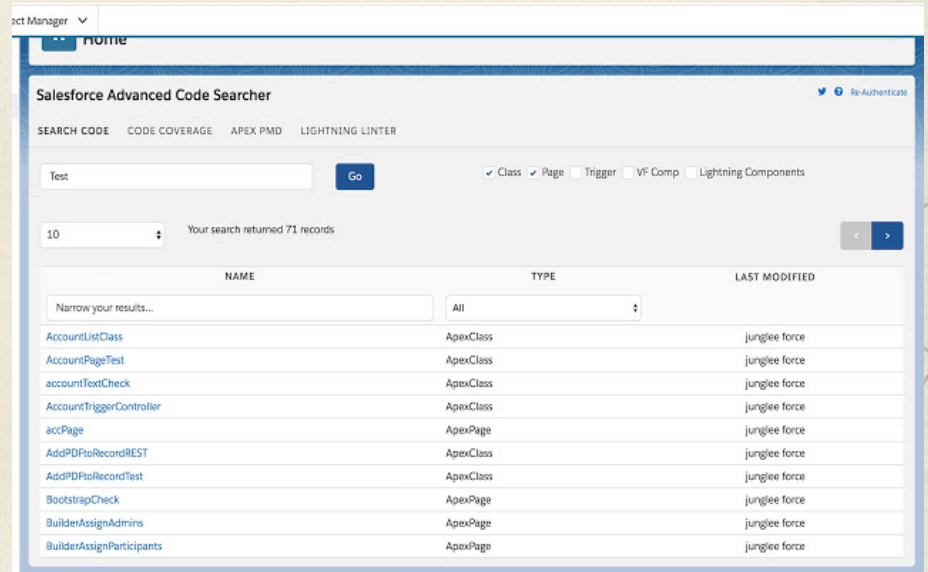

5. Salesforce Inspector

- Gives you a "backdoor" to SFDC metadata and record data
- Allows you to export and import data right from the browser
- Allows you to Login as Other Users
- Extension: <https://bit.ly/3jT9qLV>

6. Advanced Code Searcher

- Allows you to search all SFDC code
- Great for error messages
- Orgs that have a lot of Apex Code
- Other Developer Tools
- Extension: <https://bit.ly/39VOTsg>

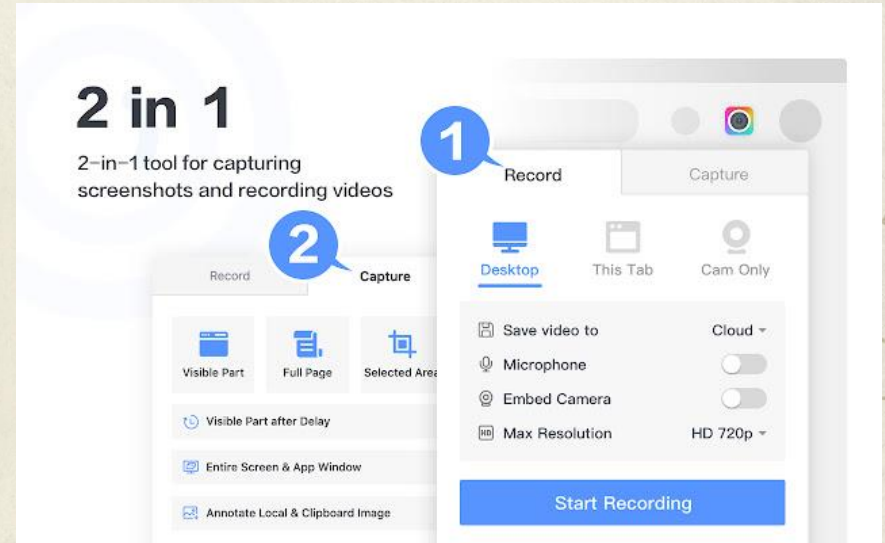

The screenshot displays the Salesforce Advanced Code Searcher interface. At the top, there are tabs for 'SEARCH CODE', 'CODE COVERAGE', 'APEX PMD', and 'LIGHTNING LINTER'. A search input field contains the text 'Test', and a 'Go' button is to its right. Below the search field, there are checkboxes for 'Class', 'Page', 'Trigger', 'VF Comp', and 'Lightning Components', with 'Class' and 'Page' selected. A dropdown menu shows '10' records per page, and a message states 'Your search returned 71 records'. The search results are presented in a table with columns for 'NAME', 'TYPE', and 'LAST MODIFIED'. A 'Narrow your results...' filter is set to 'All'. The table lists various Apex classes and pages, all last modified by 'junglee force'.

NAME	TYPE	LAST MODIFIED
AccountListClass	ApexClass	junglee force
AccountPageTest	ApexClass	junglee force
accountTextCheck	ApexClass	junglee force
AccountTriggerController	ApexClass	junglee force
accPage	ApexPage	junglee force
AdcdPDFtoRecordREST	ApexClass	junglee force
AdcdPDFtoRecordTest	ApexClass	junglee force
BootstrapCheck	ApexPage	junglee force
BuilderAssignAdmins	ApexPage	junglee force
BuilderAssignParticipants	ApexPage	junglee force

7. Awesome Screenshot and Screen Recorder

- \$5/Month
- All-in-one: Screenshots and Recordings
- Full Page Screenshot
- Simple yet robust annotation tools
- Integrates with Slack, Trello, Jira, Github
- Extension: <https://bit.ly/3PtXQWO>

Review

1. Salesforce Colored Favicon: <https://bit.ly/3jNNOAD>
2. Quick Login As: <https://bit.ly/2EzN9CL>
3. Navigator: <https://bit.ly/3gcLCR5>
4. Enhanced Formula Editor: <https://bit.ly/3ggm5WU>
5. Salesforce Inspector: <https://bit.ly/3jT9qLV>
6. Advanced Code Searcher: <https://bit.ly/39VOTSg>
7. Awesome Screenshot and Screen Recorder:
<https://bit.ly/3PtXQWO>
